

WASTE WATER TREATMENT

Biogas Plant (Anaerobic Digester Tank System)

BIOGAS

Closed tank anaerobic digester treat raw effluent of high loading and capable of reducing more than 85% of COD and BOD. It is an ideal system to incorporate biogas capture facilities to recover biogas and utilize for power generation.

Advantages of the system

BIOGAS CAPTURE

Energy recovery and fuel saving

HIGH LOADING BOD/COD

Stability and continuity in operation with capacity to handle sudden change of BOD & COD loading

CARBON CREDIT

CDM Project qualified to improve investment return
